The Center for Student Achievement offers a wide range of academic coaching services, such as tutoring and supplemental instruction. Tutors and student workers assist students in a variety of courses and help develop effective study skills. The Center is dedicated to helping students meet academic expectations and succeed in their courses.

Supplemental Instruction is back for our biggest semester yet! Over 90 students participated in the program last fall, with a record 10,888 student visits. The SI program has a strong track record of improving student outcomes, with 63% of first and second year students who participated in SI achieving a 3.31 GPA and 67% maintaining or improving their average 2.8 cumulative GPA. Students who participated in SI had an average of 9.5 more class attendance hours and an average of 10.6 more test questions answered correctly than those who did not participate.

1. Students are encouraged to start their semester strong by attending SI early and often - this fall. Check our website at www.salisbury.edu/achievement to look at this fall's SI schedule.

2. Students learn a variety of study skills that help them achieve higher course grades. For example, students in nursing courses were able to apply critical thinking skills instead of just memorizing values on a flashcard.

3. Participation in the program increases students' interaction with faculty. For example, students in the nursing program often use the SI session to ask questions in order to get the most out of the experience. Be prepared to be an active learner during these workshops.

4. Academic coaching allows the student to meet with an academic coach in a private session to discuss certain topics to enhance their academic performance or would like to improve in some aspects. Appointments are typically 30 minutes long and can be scheduled on a monthly basis.

To request a workshop, please fill out a workshop request form by visiting http://www.salisbury.edu/achievement/.
