

Internship Resources Abroad (Resources our Center for International Education is aware of)

- One excellent resource is Steven Reilly's (alum that has created company that checks out internships abroad) company is www.globalexperiences.com.
- Resources from the study abroad affiliate page at www.salisbury.edu/intled/studyabroad/affiliateprograms.asp click on AIFS. You can also go direct to www.aifsabroad.com. You can search their website for internships. They have internships in London, Cannes, France, Shanghai, Sydney, etc. They are also of complete confidence.
- Resources are also available at <http://www.australearn.org/programs/internships/>. Australearn's main website is also available off of the Center for International Education website at www.salisbury.edu/intled/studyabroad/affiliateprograms.asp. Their internships are in Australia (and New Zealand). They are geographically limited.
- Other resources that have been used by the Center are through our partner in Ecuador, South America, Centers for Interamerican Studies at www.cedei.org. A relatively high level of Spanish is required.
- There is also the student teaching internships that the Seidel school sponsors in China and New Zealand. They have their own websites at: www.salisbury.edu/intled/studyabroad/semester/teach_china.asp and www.salisbury.edu/intled/studyabroad/semester/new_zealand.asp. Obviously great opportunities for elementary education and early childhood majors, but not good for other majors.

The Center for International Education is continually adding to the list of internships and is making progress in a variety of internships abroad. Their contacts are below.

Brian N. Stiegler, PhD

Director, Center for International Education
Salisbury University
