Juniors and Seniors Email Copy

Showcase Your Skills with Experience Portfolio

Getting in front of employers and expressing how valuable you are on just a piece of paper is a challenge, no matter what career you’re planning to pursue after college. There’s so much more to showcasing your skills, talents and experiences.

Through our partner Experience, Salisbury University is pleased to introduce the Experience Portfolio. The Portfolio provides a way for you to go beyond your resume to recount personal experiences, define accomplishments and upload files and work samples that demonstrate the qualities and skills that a standard resume just can't. Here's your opportunity to let your true personality shine.

There are a multitude of benefits for any type of student, of any major. For juniors and seniors, this is a great and easy way to compile all of your information and keep track of it as you really begin the job search process.

You can share your Portfolio with your career center, mentors, professors and potential employers. In your portfolio, you’ll find 4 main components - Profile, Resume, Experiences and References.
- **Profile**: keep your contact information and career interests' fresh
- **Resume**: searchable by employers, it incorporates your work history, education, organizations, skills, and certifications
- **Experiences**: talk about internships, expand on items in your resume and other notable things you've done that really show off your talents and your personality
- **References**: have your references ready should an employer ask for them

Preparing for your career is hard but exciting work, so the more tools you have at your disposal the better. We encourage you to get started in creating a Portfolio so you can manage your job search process with ease and connect with the right employer for you!

**Start filling in your Portfolio now:**
