OBJECTIVE

To obtain an internship position with St. Joseph Medical Center in order to provide value to the organization and gain personal experience.

EDUCATION

Candidate for Bachelor of Science May 2009
Major: Clinical Laboratory Science/Medical Technology - Minor: Chemistry
Overall GPA: 3.7/4.0
Salisbury University. Salisbury, MD

RELEVANT COURSEWORK

Hematology - Collected blood specimens using proper phlebotomy techniques; Performed peripheral blood smear evaluations and manual cell differentials; Learned the origins of each blood cell component in order to diagnose anemias and other diseases of the blood; Examined automated methods for the lab including flow cytometry

Clinical Microbiology - Inoculated various media for isolation of clinically significant organisms; Demonstrated ability to identify unknown organisms using appropriate test methods including the use of MicroScan; Classified organisms using staining techniques and microscopy

Clinical Biochemistry - Utilized spectrophotometers to detect, analyze, and quantify many of those chemicals associated with health, disease, injury, and infection; Evaluated physical, chemical, and microscopic components of urine specimens; Ran serum protein electrophoresis and interpreted densitometer scans to assess various proteins in specimens
