

TurningPoint Quick Sheet: Reporting Stolen Clickers

If a clicker has been stolen, alert Public Safety and complete a Stolen Clicker Form; the Forms are located in the Public Safety.

In order to complete the Form, it will be necessary to know the original 6-character Device ID printed on the back of the clicker. Without that number, no further tracking of a stolen clicker can take place. The Device ID can be used to determine if someone else has re-registered the clicker during the current semester. Please note, any stolen clickers will need to be replaced at the student's expense although every effort will be made to detect and recover the stolen clicker.

To find the Device ID (if it is not known),

1. Log into GullNet (<http://gullnet.salisbury.edu>)

2. Click on:

SA Self Service

Learner Services

Academics

Add/Update My Clicker Device

3. If the clicker was registered before it was stolen, the 6-character Device ID will appear in the field "Clicker Device ID".
