

TurningPoint Quick Sheet: Student Blackboard Clicker Registration Setup

Instructors that require the use of clickers in the classroom and wish to import grades and participation into their MyClasses Grade Center must follow these steps to ensure that students can successfully register their clicker inside MyClasses. *This does not replace the registration of the clicker within GullNet, that should be completed as well.

1. Enter the course that requires the use of clickers.
2. Ensure that you have created a link to the TOOLS AREA of Blackboard:
 - a. Click on the [+] symbol at the top-left corner of the course menu
 - b. Choose CREATE TOOL LINK
 - c. Enter a name for the link (it can be whatever you wish, i.e. Clicker Registration)
 - d. Choose the TOOL TYPE as: REGISTRATION BLOCK (see image)
 - e. Click on the AVAILABLE TO USERS box and choose SUBMIT

3. Students will now be able to click on the button and register their clicker for your Blackboard course. When they click on the button, they will see the page below:

The student will enter the Response Device ID into the boxes provided. The Response Device ID is found on the back of their clicker. Once they have entered the ID, they can click on SUBMIT to be sent back to course. Students only have to register their clicker once for all courses within Blackboard.
