

TurningPoint Quick Sheet: Resetting and Saving a Session

Prior to starting the presentation, you must reset the session or all slides.

- **Session** - clears any previously collected response data from the software and resets the charts
- **Current Slide** - resets the chart but does not clear any previously collected response data for the selected slide
- **All Slides** - resets the charts but does not clear any previously collected response data, new response data will be appended to the end of the session

When a presentation is finished, the collected data may be saved by selecting Save Session.
To save a session:

- 1 Click **Save Session** on the TurningPoint Ribbon.
- 2 Select the desired **save location** and **name** the session file. It is recommended that you save your sessions to your P:\ drive or to a jump drive.
- 3 Click **Save**.
