

TurningPoint®

Discover the benefits of our new integrations for Blackboard, Canvas and Brightspace!

Turning Technologies is thrilled to unveil our newest Learning Management System integrations, designed to streamline the use and support of our software within your learning environment and make the most of your valuable time.

Benefits to You:

Seamless sync from TurningPoint web to desktop. No logging into your LMS via TurningPoint to download and update your course, or push grades to the LMS. Just login to TurningPoint once and you're done!

Email your students directly from TurningPoint web to remind them to redeem their subscription, add a device or create their Turning Technologies account.

Have an update to your course? TuringPoint will automatically update it as soon as you launch the software. No waiting to download the course or wondering if it is correct.

A cleaner interface within the software makes it easier and faster to find what you need.

Upload grades directly to your LMS with just the click of a button!

Nightly automatic sync provides you with the latest copy of your courses each day that you launch TurningPoint.

No more hosted links for BrightSpace and Canvas!

LEARN MORE!

Contact Client Success at csl@turningtechnologies.com for more information or to schedule a demonstration of TurningPoint's new integrations.
