The Salisbury University Student Research Conference (SUSRC) celebrated its 10th anniversary with a plenary lecture by former U.S. Assistant Secretary for Postsecondary Education — and SU alumna — Diane Auer Jones. Her talk, “Research — It’s Not Just a Job, It’s an Adventure,” began a day celebrating student scholarship, and artistic and professional achievement as participating students shared their knowledge and developing abilities. Dr. Don Spickler of the Mathematics and Computer Science Department was named Outstanding Research Mentor for 2011. Since 2003, with Spickler’s guidance, some 21 students working on 15 different research projects have presented at the SUSRC.
