

INTENT TO ENROLL

Salisbury University Respiratory Therapy Program

Students with an interest in Respiratory Therapy should declare Respiratory Therapy as their major upon application to the University. Enrollment in the Respiratory Therapy Major is a two step admission process; first admission to the University with a second approval/admission process to begin the upper division Respiratory Therapy courses. **Admission to the University does not guarantee acceptance to begin upper division Respiratory Therapy courses.**

Students are eligible to begin the upper division Respiratory Therapy courses upon completion of the admission requirements approval of the Respiratory Therapy program. Decisions regarding acceptance to being the upper division Respiratory Therapy courses will be during the spring semester, prior to the start of the fall classes.

All applicants who will be ready to begin the upper division Respiratory Therapy courses (in the fall) must complete and submit this *Intent to Enroll* form to the Program Director of Respiratory Therapy program. It is strongly suggested that this form be submitted by February 1st of each year.

After careful review of their transcripts, all applicants will receive notification in writing of their status (accepted or declined) by March 1st of each year.

Please identify the year of the fall semester in which you are requesting to enroll: Fall 20__

Please identify the campus location: _____Salisbury University Campus _____Shady Grove Campus
