

SciFinder Scholar

SciFinder Scholar

SciFinder is a research discovery tool that allows students and faculty to access a wide diversity of research from many scientific disciplines, including biomedical sciences, chemistry, engineering, materials science, agricultural science, and more.

Searching SciFinder

You can search the contents of SciFinder Scholar by Research Topic, Author Name, Company Name, Chemical Structure, Substructure, Structure Similarity, Molecular Formula, and Reaction.

After viewing your results you can pull up full-text options, refine your search results, retrieve related citations / substances / reactions, or eliminate duplicate records from your answers.

Filtering/Refining Your Searches

Filters allow you to refine your searches at the very beginning or in the middle of your search:

Publication year – limits to a particular time period

Document type – limits to certain type(s) of documents

Language – limits to a particular language

Author name – limits to a specific author

Company name – limits to a specific company or organization

Working With Search Results

The 'Detail' button provides bibliographic information and an abstract for a record.

The 'Full Text' button will connect you to the full text of a record, if available.

The 'Analyze/Refine' button allows you to analyze/refine/categorize your results.

The 'Get Related' button allows you to find cited articles, citing articles, substances indexed in the current document, reactions indexed in the current document, as well as related information from the Web.

The 'Remove Duplicates' button removes duplicate records from your search results.

Using SciFinder Scholar on the Web

- Go to www.salisbury.edu/library/articlesnmore.html
- Click on Research Port
