Evidence Based Practice Concept to Creation

The purpose of the first annual nursing EBP conference on the Lower Eastern Shore...

To introduce evidence-based initiatives that are in development and/or currently underway. These initiatives are led by local nurses, both independently and collaboratively.

The Conference will begin with an introduction to the groundbreaking paradigm shift toward the use of EBP in healthcare. Highlights of three initiatives will introduce staff, students and administrators to actual projects. Participants will be able to 'taste' the process, challenges and rewards of what nursing initiatives can do for patient care and professional satisfaction.
