Health care is one of the fastest growing and most secure fields for new graduates. Recent census data indicates that the health care industry is the largest employer in 37 of the 50 states!

Students choose to study in health-related majors because they care about making a difference in people’s lives and in the well-being of their communities.

Students also find that health care jobs are demanding but pay well.

Two health care fields, respiratory therapy and nursing, are in the top five top starting salaries for SU graduates, graduates and many of our students are admitted to professional programs like medicine, dentistry, pharmacy and physical therapy each year.

In a recent study of graduates, more than 90 percent of graduates had secured jobs in majors such as medical laboratory science, respiratory therapy, nursing, and community health within six months of graduation.

The aging of the U.S. population and the opportunity for new therapeutic innovations should keep health care jobs in high demand in the coming years.

If you are interest in health care fields, explore one of the many majors Salisbury offers to give you the best possible preparation for this promising field of the future.
