

Software Development Engineer Internship at Chesapeake Technology International

Jacob Duncan

# Introduction

• Name: Jacob Duncan

• Major: Computer Science

• Minors: Mathematics & Data Science

# Background of CTI

• Founded in April 2000 by Dustin Hellwig

• Intent: Provide user-focused, high-end software and systems development products for the Defense and Intelligence communities.

• Headquarters: California, MD

• Other locations: San Diego, CA. Camarillo, CA. Santa Barbara, CA. Denver, CO. Chantilly, VA

# Products at CTI

- CTI almost exclusively takes private contracts from the government
- Very recently started contracting publicly through other companies
- WEAVR (product I worked on) was one of CTI's first software products they had ownership of

### Size of Company & Company Environment

- CTI has just over 100 employees (from all around the world)
- Many of these employees are veterans or ex-military members
- CTI is very active in the TAK product center and attend meetings all over the world to demo our software

# Introduction Interview Onboarding

• Reached out via website contact form

- Soft skills interview with Director of Technology
- Given take home coding question

- Technical interview to review code and demo
- Hired as remote Software Development Engineer intern in February

### Devices

- Apple Macbook Pro 2015 Work Laptop (Left)
- Samsung Galaxy S20 (Middle) aka EUD
- Gamin Fenix 6x Pro (Right) aka Wearable

# Team placement & co-workers

- Placed on team WEAVR upon entering company
- Team consisted of 6 people at the time
  - 1 Product Manager
  - 4 Software Engineers (including myself)
  - 1 QA Tester
- The team members and size changed multiple times since I've been on it

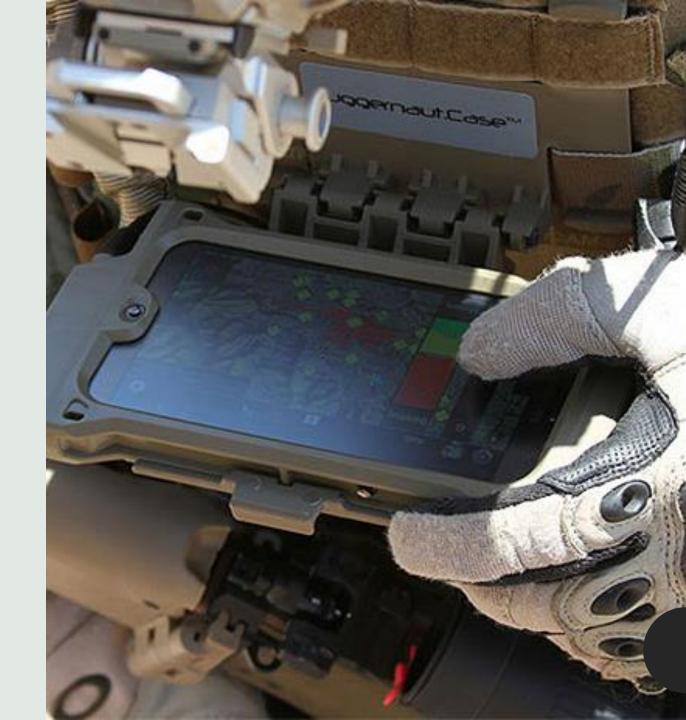

# Development Workflow

TAK board				() 0 days remaining	Complete sprint Board v
WEAVR Final Sprin	it			G 0 days remaining	Complete sprint board +
QUICK FILTERS: Only My Iss	sues Recently Updated				
TO DO	IN DEVELOPMENT	TEST PLANNING	CODE REVIEW	IN TESTING	DONE
TAK-546	TAK-641				TAK-509
Wearable WEAVR App		2			TAK-509 WEAVR App - if the
- need to improve the situation where a	- get a connect IQ error when confirming				weavr panel is open when a blueforce
TAK-625					<del>7AK-513</del>
Investigate Rotating update windows for POI's not selected					WEAVR App - Blueforce objects always show
TAK-626	v				TAK-571
Only calculate distance on Compass view for selected item					WEAVR App - it is not possible to remove BFT objects from the weavr
TAK-640					TAK-508
Wearable WEAVR App					Wearable WEAVR App

- Agile development
- Jira for kanbam board, ticketing system, and swimlanes
- Complete task or bug fix
- Push code to GitLab and request review of MR

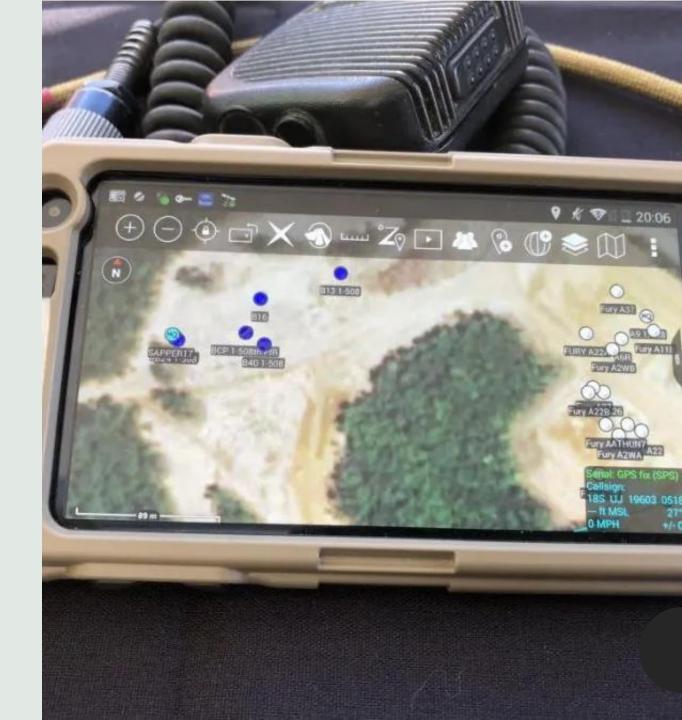

#### Wearable Awareness Viewer (WEAVR)

- Initially called TAKWatch, the project I was put on upon entering the company as an intern was WEAVR.
- WEAVR was created as a solution to a problem that many soldiers using ATAK were having (explain the problem)
- WEAVR consists of 2 technologies
- 1. ATAK Plugin
- 2. Native Garmin Application

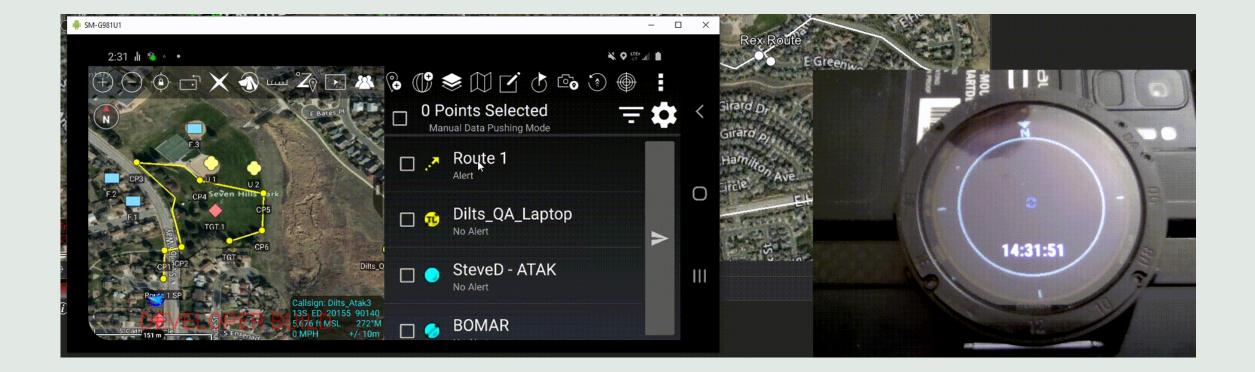

#### ATAK: Android Team Awareness Kit

- Android smartphone app
- Allows for precise targeting, land formation intelligence, situational awareness, navigation, and data sharing
- This android app is part of a larger TAK family of products

#### How WEAVR solved this issue

# Responsibilities in WEAVR

- Support team members in coding & research efforts
- Write thorough notes on my process to complete tasks or setup
- Actively review Merge Requests via GitLab code repository
- Contribute new and innovative ideas as well as share my progress in daily standups
- Take on upwards of 60 story points per sprint

# Notable Contributions

• Live map sync

Live On Screen Filtering Duncan, Jacob authored 4 months ago and 😳 Dilts, Michael committed 4 months ago

• Render routes and route segments

feature/TAK 308 - Route Navigation functionality (stand alone & integration... Duncan, Jacob authored 3 months ago and 😳 Dilts, Michael committed 3 months ago

- Sync route progression on watch with ATAK
- Persist routes

Persisting RR Distance on WEAVR shutdown Duncan, Jacob authored 3 months ago and 🗇 Dilts, Michael committed 3 months ago

TAK-622: Default Selectable to True && TAK-637: Fix Route Persistence Duncan, Jacob authored 2 months ago and 🟵 Pompelia, Cory committed 2 months ago

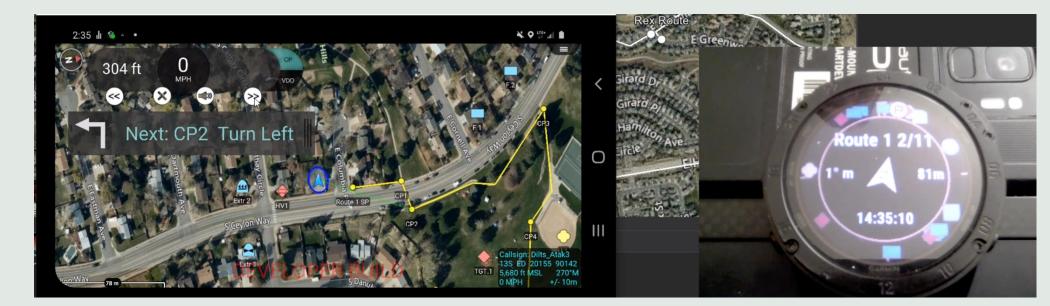

• Allow route progression in standalone mode

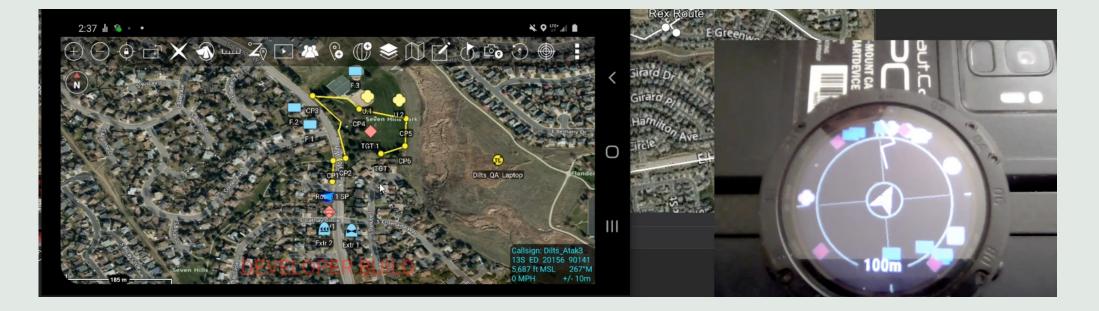

# Live Map Sync Filtering

- Filter POI view has "Only Points Visible in Map View" checkbox
- Only items currently on map will be shown in the ATAK plugin

#### Filter POI List (i) Narrow down you POI list by filtering undesired element types - Select All Hostile Type Points User Selected Points Friendly Type Points Only Points Visible in Map View Neutral Type Points Unknown Type Points Spot Marker Type Points Routes $\square$ $(\bullet)$ 0 Points Selected Manual Data Pushing Mode TGT.2.103818 No Alert □ ■ N.2.103822 $\square$ $(\mathbf{+})$ **0** Points Selected Manual Data Pushing Mode

#### Routes

#### Newest Project: Health Score Algorithm

- Started this new project in mid- November
- Contracted through Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense (JPEO-CBRND)
- Massachusetts Institute of Technology (MIT) will be supplying our team with their patented health score algorithm, developed last year

# Goals for JPEO-CBRND Project

- Analyze algorithm MIT gives us
- Optimize algorithm to work with restricted computing power (on garmin watch)
- Constantly read sensors on watch in order to collect data to feed into the algorithm
- Connect multiple watches to 1 EUD (Android) device in order to check health scores

Subject wears heart activity monitor ECG trace Algorithm Result relayed to mobile device SICK IN 30 HR

# Challenges I faced

- Scheduling (Standups, meetings, etc.)
- Learning new Garmin proprietary language (MonkeyC)
- Analyzing and understanding a large codebase

# How SU helped me in my Internship

- COSC 117 Java
  70% of the work I did was in Java
- COSC 425 Working with team

Working with other teammates I rely on to get my work done

• COSC 320 - Data Structures Used queues, dictionaries, arrays, arraylists, etc.

# What I learned

- Never be afraid to ask questions, no matter the circumstance
- Exhaust every reliable option before asking for help
- Use documentation and resources available to you
- Step up to leadership positions
