

bathmap

A Bathymetric Mapping API

Project Description

BathMap is a bathymetric mapping API. We combine NOAA's bathymetric data with our technical skills to offer a developer friendly API that will allow you to integrate with NOAA's latest bathymetric data. We also provide a data viewer built using our API for users who'd like look at the maps.

Technology Used

Experience Gained

- > Real world strategies used for software development
- > Gained a deep understanding of bathymetric data
- > Deeper dive into git, version control and using teamwork alongside these
- > "Take the time you think it will take to add that feature, then multiply by 3"
