PRESENTER

Ryan Rosiak

Ryan majored in Computer Science and Data Science and minored in Math while he attended Salisbury University. During the summer of his sophomore year, he participated NSF REU EXERCIS. He worked as a software engineer intern for JP Morgan Chase during the summer of his junior year. Currently, he is a full-time software engineer for a Machine Learning application development team at JP Morgan Chase. He loved his time at Salisbury University, during which he worked as a tutor in the math emporium, a lab assistant working with high school students, and enjoyed various activities around campus. He is the winner of the Most Promising Computer Scientist Award of Class 2022. This is a prestige Departmental award given to one Student with the best academic performance in a graduating class each year.
