

# Forensic Science Program

## Henson School of Science and Technology

### PROGRAM

#### MAJOR

- Integrated Science,  
B.S – Forensic Science  
Concentration

#### Program Overview

Forensic science is the use of scientific methods or expertise to investigate crimes or examine evidence that might be presented in a court of law. Salisbury University's forensic science concentration prepares students for the field of forensics through rigorous hands-on coursework taught by faculty who have experience in the field of law enforcement, forensics and law.

#### A Proud Partnership

SU is proud to partner with Wor-Wic Community College (WWCC) to provide this unique forensic science curriculum on Maryland's Eastern Shore. Students in the forensic science program will complete criminal justice courses at WWCC and the remaining courses at SU. The combination of these classes allows students to meet the graduation requirements at SU.

#### Career and Internships

Students gain valuable experience by participating in internships. Advisors and instructors work with students to find an internship that matches a student's interest, timing, and location.

Ultimately, the forensic science program prepares students for graduate school in forensic studies or to enter the forensics workforce. Graduates can work in several types of job settings, including public and

private laboratories as well as law enforcement agencies. Within these job settings, graduates are prepared to serve in a variety of positions, including:

- crime scene technicians
- forensic DNA analysts
- forensic drug chemists

#### Why Join Our Forensics Flock?

**Affordability:** *U.S. News & World Report* and others recognize SU's excellent value and high-quality programs.

**Small Class Size:** With a 13:1 Student-Faculty Ratio, you will receive individualized attention in your courses.

**Professors Who Inspire:** Our experienced faculty are invested in your future.

**Opportunities:** Experience the countless opportunities at SU, such as research, study aboard and internship programs.
